Introduction

No doubt; beekeeping equipment is vital to profitable beekeeping. As a beginner or experienced beekeeper; a lot of decisions on choice of equipment depend on personal philosophy of life and philosophy of beekeeping. Some people believe in making their own equipment while some think it should be procured from the manufacturers because of precision. Whatever your decision, you'll have to decide where you stand. The bottom line is that beekeeping cannot be practiced in isolation of some basic equipment.

The Centre for Bee Research & Development (CEBRAD) welcomes you to its 2018 catalog, a one-stop shop, where we have all beekeeping equipment of your choice ranging from raising the bees to producing honey and other bee products with brief description and their prices for your consideration and order placement.

CEBRAD is a renowned tropical beekeeping organization for over two decades and we are well versed in beekeeping equipment production and installations, production of training materials and trading in bee products. All our materials and equipment are of the highest quality grade and meet international standard coupled with a full 100% No-Risk Guarantee, speedy service and professional advice. Just a phone call, email or WhatsApp chat will take you to the right place.

A new product, Multipurpose Honey extractor/Wax Meter, is been added to the stable of our equipment. The equipment will extract honey and also render beeswax, serving duo purposes. The beauty of this equipment is the diverse sources of heat which range from electric heater to gas, kerosene stove, charcoal etc. Try out this equipment and save some money.

CEBRAD MODIFIED KENYAN TOP-BAR HIVE

APE 001

This hive is very suitable for tropical beekeeping and very easy to manipulate on the field. It is made to accommodate 20-25 top-bars incorporated with inner feeder, queen excluder and division board. The small windows at both sides are meant to provide adequate ventilation for the colony especially during migration and dry season.

Price: N12,500

LANGSTROTH HIVE

APE 002

This hive is most widely used all over the world for ease of bees' manipulation. It comes in components of brood chamber of 462x372x240mm inner dimension similar with super. Other accessories are the bottom board, inner and outer cover with a zinc-plated metal sheet, and frames (10 each in brood and super bodies) wired to make them sturdy to prevent combs from being damaged during hive movement and honey extraction.

Price: N22,000

PLASTIC QUEEN EXCLUDER (HIVE ACCESSORY)

APE 003

Queen excluder is used to confine queen in the brood area of the hive so as to prevent her from laying eggs in the honey area. In our new improved KTB, queen excluder is used for this purpose as utilized in Langstroth hive;

BEE DRESS AND BEE VEIL

APE 004

Our bee dress is made of white color khaki or chinos material which consists of normal dress, veil with gloves and gauntlet. The wrist and ankle are bee-proof with elastic rubber. Because of the texture of the material, it is easy to work with the African bees without

and it helps in good quality honey and higher productivity.

Price: N2,500

too much perspiration. The bee dress is big enough to make movement free and avoiding bee stings penetrating it. Bee veil can be purchased as spare for replacement of spoilt one.

Prices:

Bee Dress: N8,500

Bee Veil: N3,500

ESTABLISHED COLONY

APE 005

Established colony is meant for newbie in the beekeeping vocation as foundation stock to start up the enterprise. Our established colony is sold with the hive and all the accessories in it for colony build up. We also provide colony records attached to it. Established colony can be purchased throughout the year.

Price: N15,000
(Excluding Transportation)

PACKAGED BEES

APE 006

Our packaged bees are used for the establishment of new colonies especially for beginner beekeeper who couldn't get natural swarm on time or for expansion purpose. Each pack is provided with a newly mated and laying queen, and some thousands of worker bees. Packaged bees are usually booked and paid for in advance not later than the month of April in the year. All packaged bees will be supplied latest by mid-November of same year.

Price: N5,000
(Excluding Transportation)

QUEEN CAGE

APE 007

Queen Cage is used to isolate the queen from the colony to safeguard her especially in the packaged bee or during queen rearing program where many queens emerge almost at the same time. It is made of toughened plastic material that can be used as many times as possible.

Price: N1,000

QUEEN CLIP

APE 008

Queen Clip is used to isolate the queen during colony manipulation and later returned after the exercise. It's made of hard plastic material and long lasting.

Price: N1,500

SMOKER

APE 009

Our smoker comes in two sizes, jumbo and small sizes. Smoker is important apiary equipment used to calm down the bees during inspection, harvesting and or colony

BEE BRUSH

APE 010

Bee brush is a hand-held material used to brush off clinging bees from the surface of the comb during hive inspection, harvesting

manipulation in order to break the communication pheromone transmission amongst the worker bees.

Prices:
Big Size: N7,500
Small size: N5,000

or colony manipulation. It is made of soft plastic or wooden material that cannot hurt the bees.

Price: N1,800

HIVE TOOL

APE 011

This is a spring material used to prime out top-bars or frames attached to the hive body with propolis. The bees make propolis to block any crevices that may be used by the intruders like pests and predators. It is made of stainless still material which cannot contaminate the hive products.

Price: N3,000

OBSERVATION GLASS HIVE

APE 012

Our Observation Glass Hive is constructed with well-seasoned wood that is non-toxic to the bees to observe the bee colony activities mostly for research purposes to monitor specific activity in the colony; and for teaching basic beekeeping course.

Price: N15,000

CEBRAD QUEEN REARING SYSTEM

APE 013

It consists of Lay Cage, Front Cover and Plug. With our Queen Rearing System, you will produce your own queen with ease using not more than 24 hours day-old larvae.

Price: N3,500

SWARM CATCHER

APE 014

The hive, with 5 top-bars, is quite adequate for swarm catching during the swarming season. Built with inner feeder to take care of the swarm before final establishment in the normal hive. The swarm catcher is built with high quality seasoned wood that is non-toxic to the bees.

Price: N4,500

HONEY PRESS (STAINLESS STEEL)

PRE 101

Our honey Press comes with different designs. Manual with hydraulic jack and other incorporated with water heater for crystalized honey.

Prices: N75,000

3-FRAME CENTRIFUGAL EXTRACTOR

PRE 102

3-Frame Centrifugal Extractor is used for frame hive extraction of honey. It comes with gear system that aids spinning and constructed with stainless steel.

Price: N130,000

MULTIPURPOSE HONEY EXTRACTOR/WAX MELTER

PRE 103

Our Multipurpose Honey Extractor/Wax Melter is made of stainless steel materials, easy to use and fast. The beauty of this machine is the source of heat which can be electric heater, gas cooker, charcoal, kerosene stove or firewood.

Prices: N85,000 – N125,000

FILTER PRESS

PRE 104

Made of stainless steel material for high speed filtration of crude honey after extraction. It is good for commercial honey packers.

For quotation, please contact us

HAND PUCH – API 016

Hand punch is used to remove a day to 2-day old eggs with the comb for queen rearing exercise.

Price: N850

DOUBLE FILTRATION MESH

PRE 105

Double Stainless Steel Honey Strainer for honey filtration is very ideal for low- medium scale beekeeper whose quantity of honey to be processed is small. It can be integrated to honey press or used separately.

Prices: N25,700 - N30,000

COMPLETE PROCESSING PLANT

PRE 006

This equipment can process 3 -4 tons of honey per day and can be incorporated with Honey dehumidifier.

For further information about the machine, please call 08066744545 or send email to cebrad@cebrad.com

BASIC BEEKEEPING COURSE

EBC-100

The Basic Beekeeping Course will equip you with quality beekeeping information and a results-driven mindset. An online course with a day practical session, BBC will expose you to the rudiments of beekeeping for the beginners with no hassle. For detail information send email to cebrad@cebrad.com.

Course Fee: N15,000

POLLEN DRIER

PRE 108

The equipment dries 5-10 kg of pollen in 24 hours. Air heating is obtained by means of 2x500W electric resistors with thermostat. Hot air is circulated by a fan installed on top

of the equipment. The temperature is determined with the aid of thermometer.

Quotation on request.

FOUNDATIONS OF BEEKEEPING IN THE TROPICS
